Experience

Flutter Developer Intern

Team Redevs

Jan 2026 – Jun 2026 (6 months)

- Developed and maintained cross-platform mobile applications using **Flutter** and **Dart**, improving development efficiency by **30%**.
- Integrated REST APIs for dynamic data handling, reducing load time by **20%** through optimized network calls.
- Collaborated with UI/UX designers to build pixel-perfect interfaces using Material Design, improving user engagement.
- Implemented **Provider state management** to ensure efficient UI updates and scalable app architecture.
- Debugged and optimized application performance, reducing crashes and improving app responsiveness.

Projects

E-Commerce Flutter App

- Built a complete e-commerce mobile application with product listing, cart system, and responsive UI.
- Implemented **Provider** for state management and **Hive** for local data persistence.
- Integrated REST APIs to fetch product data dynamically.
- Improved performance using efficient widget rebuilding and state handling.

Task Manager App

- Developed a task management app with filtering (Completed / Pending / All).
- Used REST API integration and **Provider** for state updates.
- Designed clean architecture (Model, Service, Provider, Screens).

Meditation App

- Designed a user-friendly meditation app with clean and responsive UI.
- Focused on reusable widgets and smooth navigation experience.

Technical Skills

Languages: Dart, Java (Basics), HTML, CSS

Framework: Flutter

State Management: Provider

Database: Hive, Firebase

Concepts: REST API Integration, JSON Parsing, Debugging, Performance Optimization

Tools: Git, GitHub, VS Code, Android Studio, Postman

Education

Bachelor of Technology (B.Tech) - Computer Science Engineering

NIMS University Jaipur

Core Competencies

Flutter, Dart, Cross-platform Development, REST API Integration, State Management, UI/UX Implementation, Debugging, Performance Optimization, Mobile Application Development, JSON Parsing
